

WORKSHOP “SGUARDI SUL CHIANTI”

This project is inspired by FOCUS ON MONFERRATO , organized by Tuscany Photographic Workshop in collaboration with the Piedmont Region

“ The idea is born from the objective to value, through the photography, a landscape interpreting it not only like nature, but also like history and culture, like atmosphere of the spirit, and also to give breath to the creativity and to the imagination of the young artists. Under the guide of the teachers , the students could choose the subjects on which to develop their vision. Therefore, beyond to the standard images, on the landscape or the grape harvest (also these will be interpreted with new eyes),also will be treat of the matters less famous and striking, that concern the private life of the inhabitants of this region. It will be deepened the stories relating the persons, the local legends, the tradition.”
(from: www.focusonmonferrato.it)

We can adopt the same project on our territory.

Students to the last year of photography schools and young photographers from all the world are select to subject their portfolios.

The selected participants to the project are invited to stay in a residence of the La Macina di san Cresci to work on a Chianti's area, both like reportage, and documentation of the landscape. The participants will be conducted from a team of professional photographers. Then the job of the students will be shown in an exposition .

The purpose of the project is to offer to young photographers and photography students the possibility to compete with a real project - a wide reportage on the life of the Chianti – under the guide of a team of experts.

This project will be realized in collaboration with the University of Wales.
